- A library RFID data model for international use should be highly flexible without sacrificing interoperability
- The model should reflect sympathy for the concern shown in some countries regarding borrower privacy
- The model should embrace existing standards where possible
- The model should provide a mechanism for non-exclusive Item Security by means of the RFID tag
- The model should represent a contribution towards an open & standards-based systems architecture for library RFID
- To the extent possible, the model should provide for changes to RFID technology platforms in the future

---

1 MB = Member body (enter the ISO 3166 two-letter country code, e.g. CN for China; comments from the ISO/CS editing unit are identified by **)
2 Type of comment: ge = general    te = technical    ed = editorial

**NOTE** Columns 1, 2, 4, 5 are compulsory.
